- **.NET Stack:** C#, ASP.NET, WPF, LINQ, WinForms, NUnit, IIS
- **Java Stack:** Java, JSP, Spring MVC, JUnit
- **Front-End:** HTML, CSS, JavaScript, Bootstrap
- **Databases:** SQL Server, PostgreSQL
- **Certifications:** Certified Scrum Master, OnBase Certified API
- **Other:** Web Services, Visual Studio, Agile, TFS, Git, Fiddler

EXPERIENCE

08/2016 – Present

Solution Developer

Hyland Software, Inc. – Westlake, OH

Implement custom OnBase solutions and integrations for global enterprise customers as a consultant and developer on Agile and Waterfall project teams. Project highlights include:

Expiring Link Functionality for External Document Viewer

- Developed ASP.NET wrapper application using the OnBase API to allow external users to access documents with expiring links for better security, using RSA and SHA cryptography methods.
- Wrote a suite of tests using NUnit and Apex (Salesforce) code.
- Deployed and migrated solution across dev, test, UAT, pre-prod, prod, and additional, load-balanced environments for 3 enterprise customers, including the company's largest-ever services engagement.
- Wrote thorough documentation and specs for 3rd-party developers to form URLs for the app and for OnBase admins to maintain it after go-live.

3rd-Party Database Integration

- Wrote, configured, and deployed an integration between OnBase and an Epicor (SQL Server) database for an Accounts Payable solution.
- For a data retrieval component, wrote C# scripts to consume stored procedures to fill datasets on HTML forms. For a data archival component, wrote scripts and configured workflow logic to export invoice information to the external database via an ODBC connection.

Guidewire ClaimCenter Integration

- Developed custom C# scripts, including publishing and consuming SOAP web services, to integrate solutions with the Guidewire insurance product suite.
- Wrote pre-processors to enrich document metadata for bulk document import processes.
- Conducted onsite training session with company's end users and wrote training and system admin documentation for future support of the solution.

09/2014 – 05/2016

Director of Marketing

PS Lifestyle – Cleveland, OH

- Hired and directed a team of 3 in development and execution of multi-channel marketing programs, lead re-branding campaign, and established style guidelines for a \$17 million brand.
- Refreshed the firm's digital presence, more than doubling the firm's Facebook, Twitter, and LinkedIn followings organically within 9 months.

SIDE PROJECTS

- **Buzzword Bingo** – game built with JavaScript, AJAX, Node.js, Handlebars, and SQLite: rebecca-sullivan.com/bingo-squares
- **Cleveland GiveCamp** – overhauled website using HTML/CSS and Squarespace for a non-profit hackathon: summitfoodcoalition.org
- **Meal Planning/Recipe Web App** – built with Bootstrap, HTML/CSS, JavaScript, Java, Spring, and PostgreSQL.
- **Hyland Software** – panelist for Women in Tech conference; committee member for Hyland Women in Networking.
